End Notes

There are three kinds of end notes. First, when you take an idea or concept that you had never heard of before and cite it. This is done mostly in an academic environment, and this is not strictly an academic commentary, but I included them nonetheless in an effort to be thorough. Secondly, you reword a section written by another author. And thirdly, you quote directly. I have included all three types of end notes to be detailed. Most authors don't include all three. If my book of **Dani'el** was bound as a book it would be 417 pages with 164,534 words. That averages out to a very reasonable ratio of about one reference per page.
