1. **Phylogenetic relationships:** How are the different groups of organisms related to each other? What is the evolutionary history of the group?

2. **Geographical distribution:** Where are the organisms found? What are the patterns of distribution?

3. **Ecological roles:** What roles do the organisms play in their ecosystems? How do they interact with other organisms?

4. **Evolutionary processes:** What processes drive the evolution of the group? How do these processes shape the diversity of life?

5. **Conservation status:** What is the conservation status of the group? What threats do they face?

6. **Biological diversity:** How does the group contribute to the overall biodiversity of the planet?

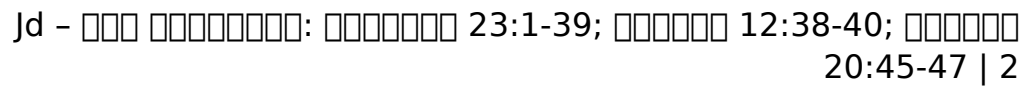

7. **Human impact:** How do human activities affect the group? What are the consequences?

8. **Biotechnology:** How can the group be used in biotechnology? What are the applications?

9. **Medical importance:** How does the group relate to human health? What are the implications?

10. **Philosophical questions:** What philosophical questions arise from the study of the group?
